Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 February 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-5 in the reply filed on 2/16/2005 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamauchi (JP-2001-217443).

Regarding claim 1, Yamauchi discloses on figure 7 a semiconductor device comprising a support 14 which a sheet comprising a ferromagnetic material; a binding material 15 adjacent to the sheet comprising the ferromagnetic material and an element 16 on an insulating film 7 adjacent to the binding material.

Regarding claim 2, Yamauchi discloses on figure 7 the element 16 is an element having liquid crystal.

Regarding claim 3, the claim language is merely the product by process and therefore does not structurally distinguish from Yamauchi herein.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Utsunomiya (JP-2001-051296).

Regarding claim 4, Utsunomiya discloses on figure 21 a semiconductor device comprising a support 100 which is a binding material; a protective film 120 on the binding material; a middle processing component 140 comprising a control section and an operation section and a memory unit on an insulating film 142 adjacent to the binding material; and the middle processing component includes a thin film transistor of n channel type and a thin film transistor of p channel type (readable on figure 21).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Utsunomiya as applied to claim 4 above, and further in view of Ohtain et al.

Regarding claim 5, Utsunomiya discloses on figure 21 substantially all the structure set forth in the claimed invention except the semiconductor device being a video camera. However, Ohtain et al. discloses on figure 13b the semiconductor device being a video camera. In view of such teaching, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Utsunomiya by

having the semiconductor device being a video camera for the purpose of utilizing the improved thin film transistor in a video camera.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Nguyen whose telephone number is (571) 272-1734. The examiner can normally be reached on Monday-Friday, 7:30 am- 4:30 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on (571) 272-1664. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306 for regular communications.
